Zimmer Biomet Institute

Date: September 6 – 8, 2017

Course Hours: Wednesday/Thursday 8.15 – 17.15, Friday 8.15 – 15.30

Title: Basic Course in Implant Surgery and Prosthetics

Speakers: Assoc. Prof. Dr. Dimitar Filtchev & Drs. Peter van der Schoor

Level: Basic

Course Topics:

Take the first step with this three-day course that focuses on basic surgical principles and protocols. This basic course is for dentists with limited experience in implantology who want to take the leap into placing implants. The goal is to empower surgical and restorative skills with the knowledge and confidence necessary to start a simple dental implant practice. After this course, participants should be able to develop their own protocol for the assessment, diagnosis, treatment planning, surgical placement and prosthetic restoration of single-tooth posterior implants. This intensive course includes both lectures and hands-on training.

Learning Objectives:

- Gain significant knowledge in the area of surgical implant placement, using a detailed and methodical approach that should allow dentists to start surgical procedures in their own practice.
- After this course, dentists should feel competent and ready to start a simple, posterior implant practice immediately.
- Be able to create simplified flow charts for case selections, surgical site assessment, implant selections, biomaterials selections and patient management.

Level Basic	Hands-on Workshop	Date September 6 – 8, 2017	Course Schedule Wednesday/Thursday 8.15 – 17.15 Friday 8.15 – 15.30	Class Size Maximum 24	Course Fee ¹⁾ \$ 800	Course Language English
