

Treatment Guidelines for Immediate Provisional Restoration in the Aesthetic Zone: Part I

LIVE CE WEBCAST

Provisional crown restorations can be very helpful in the development of gingival contours during the healing phase of implant treatment. Properly done, at the appropriate stage of treatment, they will lead to predictable, aesthetically pleasing outcomes. The dental team must decide whether a provisional restoration can be placed immediately, at the time of implant placement. They must also decide whether the provisional restoration will be made directly in the mouth or outside the mouth on models that represent the clinical situation. This presentation will discuss the guidelines for choosing immediate or delayed placement of provisional restorations, and different methods for preparing provisional restorations.

After completion of the program, participants should be able to:

- Describe the difference between immediate and delayed placement of provisional crown restorations on dental implants and criteria for selecting between them.
- Describe the advantages of using a provisional crown restoration to develop gingival contours, both interdentally and on the facial aspect of an implant and abutment.
- List and describe the steps in making a provisional crown directly in the mouth or indirectly, on a model.
- Describe the evidence-based evaluation of implant restorations in different locations in the mouth.

Edward R. Schlissel, DDS, MS

Dr. Schlissel received his dental degree from State University of New York (SUNY) at Buffalo, School of Dentistry in Buffalo, New York and his Materials Science degree from SUNY at Stony Brook, College of Engineering and Applied Sciences, in Stony Brook, New York. He is a Fellow of the Academy of General Dentistry and a member of the Academy of Osseointegration. Dr. Schlissel is currently Assistant Clinical Professor of Surgery in the Division of Oral and Maxillofacial Surgery, Department of Surgery at Emory School of Medicine in Atlanta, Georgia and Professor Emeritus of General Dentistry, School of Dental Medicine at SUNY at Stony Brook in New York. Dr. Schlissel currently maintains a private practice in Marietta, Georgia.†

July 27, 2017
