

Treatment Planning for Optimal Implant Restorative Outcomes

Speaker: Simon D. Brown, BDS, DCLinDent (Pros)

PROGRAM DESCRIPTION:

This program will concentrate on treatment guidelines for achieving optimal aesthetics in implant dentistry. During the program, the following topics will be covered:

- Case planning & Treatment options (bring cases to discuss)
- Impression Options & Encode
- Immediate Provisional restorations – restoring a single implant within 24 hours of surgery
- Surgical Guides – what the surgeon expects & tips on how to make
- Do's & Don'ts of Overdenture Bars
- Abutment Crown options – when to choose which

Speaker: Simon D. Brown, BDS, DCLinDent (Pros)

Dr Simon Brown completed his undergraduate degree in Otago in 1993 before working Newcastle, Australia for the Hunter Area Health Board. In 1995 he entered general practice developing an interest in prosthodontics over the next 10 years. He returned to New Zealand in 2007 and completed his Doctor of Clinical Dentistry degree in Prosthodontics in 2009. Simon's thesis was a clinical trial investigating immediate placement and restoration of single implants in the aesthetic zone. It also investigated the

clinical performance of zirconia screw retained crowns.

In 2010 Dr Brown moved to Auckland and is working within Auckland's regional Head and Neck Unit providing maxillofacial prosthodontics for patients affected by cancer. In 2011 he also established North Shore Prosthodontics. He is excited about prosthodontics, teaching and enjoys working with a multidisciplinary team and the benefits it provides.

Dr Brown is a current member of the International College of Prosthodontists and is the President of the New Zealand Academy of Prosthodontists and Restorative Dentists.
