Speakers

Prof. Dr. Zoran Lazić* (Serbia)

He graduated from the School of Dentistry, University of Belgrade. He finished his training in oral surgery in 1993, gained master's degree and finished his PhD thesis in 2004 in the field of oral implantology and growth factors. Since the beginning of his career Prof. Lazić has worked at the department of oral implantology in the Military Medical Academy (MMA) and he currently holds the position as head of Clinic of Dentistry. Prof. Lazić is director of postgraduate oral implantology program at MMA and visiting professor at two Universities. On this subject he published over 30 articles. Prof. Lazić maintains a private practice in Belgrade, Serbia.

Assoc. Prof. Dr. Dimitar Filtchev* (Bulgaria)

Assoc. Prof. Dr. Dimitar Filtchev acquired a post-graduate specialization in Prosthetic Dentistry in 2003, in 2013 he obtained a PhD Degree. Since 2015 he is an Associate Professor at the Department of Prosthetic Dentistry in Sofia, in 2019 he got a MSC degree in Periodontology from the University of Bologna Italy, led by Prof. Zucchelli. Running a private practice in Sofia, Bulgaria focused on Aesthetic Dentistry and Implantology and lecturing at many national and International congresses.

*All of these clinicians have a contractual relationship with Zimmer Biomet Dental resulting in their presentations, consultancy work and other professional services.

Summary

Zimmer Biomet Institute

Zimmer Biomet Institute tries to transform the traditional classroom into a revolutionary learning facility. Each Zimmer Biomet Institute is equipped with the latest tools and advancements in implant dentistry as well as state-of-the-art audio and visual equipment. But what truly makes Zimmer Biomet Institute a world leader in dental education is our Simulated Patient Training Laboratory.

Day 1

Will focus on diagnosis and treatment planning for the aesthetic zone. Information will be presented in lecture and group discussion formats. Laboratory procedures will be accomplished regarding immediate implant placement and provisional. GBR procedures for critical cases using bone replacement material. The digital workflow will be included in this rehabilitation for single tooth treatments.

Day 2

Will focus on full arch protocol, how to restore edentulous patient with immediate restoration. Surgical criteria's and free hand guided surgery technique will be performed. The laboratory exercises will concentrate on removable, implant-supported overdentures including clinical and laboratory steps needed for aiming fabricating stable, retentive removable overdentures. Sinus lift procedure with or without Implant placement.
