

## CE WEBCAST

This program will identify restorative volume (space) requirements for full arch fixed/removable, implant restorations. Literature citations will be identified and used for clinicians and dental laboratory technicians to make evidence-based decisions regarding restorative treatment parameters involved in treating full arch patients with fixed and removable implant restorations. Treatment planning guidelines will be identified, as well as clinical scenarios where adequate restorative volume (space) has been generated. Clinical situations where adequate restorative volume (space) was not provided will also be identified; clinical remedies will be illustrated.

After completion of the program, participants should be able to:

- Understand optimal workflows in order to incorporate digital dentistry in the dental practice.
- Comprehend the benefits and limitations of intraoral scanners.
- Recognize the value of utilizing advanced technologies for developing and sustaining aesthetic restorations supported by dental implants
- Understand the design principles used in CAD/CAM abutment design.

### Carl Drago, DDS, MS, FACP

Dr. Drago received his DDS from The Ohio State University College of Dentistry and MS from the University of Texas Graduate School of Biomedical Sciences at San Antonio. Dr. Drago is a Diplomate of the American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the American College of Dentists. He has more than 80 published articles and has written four textbooks on dental implants. He is an Adjunct Associate Professor in Graduate Prosthodontics at Marquette University School of Dentistry. He maintains a private practice limited to fixed, removable, and implant prosthodontics in LaCrosse, Wisconsin. †

**DATE/TIME:** On Demand-Viewing

**CONTINUING EDUCATION:** 1 Credit
