

# Prosthetic Implant Complications: What Have We Learned?

## LIVE CE WEBCAST

This program will illustrate through clinical examples, long-term success and failures associated with prosthetic implant restorations. Original concepts in diagnosis, treatment planning, and therapies will be compared to modern day treatment concepts and principles, especially regarding advances in equipment and technologies. Evidenced-based treatment successes will be illustrated for fixed, removable, and single-unit implant restorations.

After completion of the program, participants should be able to:

- Discuss the benefits and limitations associated with fixed, removable, and single-unit implant restorations in terms of long-term success.
- Discuss the advances in short- and long-term success of implant restorations based on evaluating past performance of implant restorations.
- Identify clinical procedures and implant components required for predictable and successful prosthetic implant restorations.
- List the steps and procedures needed in various clinical situations relative to the most common implant prosthetic procedures performed.

### CARL DRAGO, DDS, MS, FACP

Dr. Drago received his DDS from The Ohio State University College of Dentistry and MS from the University of Texas Graduate School of Biomedical Sciences at San Antonio. Dr. Drago is a Diplomate of the American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the American College of Dentists. He has more than 80 published articles and has written four textbooks on dental implants. Dr. Drago currently serves as the Clinical Science section editor for the Journal of Prosthodontics. He is an Adjunct Associate Professor in Graduate Prosthodontics at Marquette University School of Dentistry. He maintains a private practice limited to fixed, removable, and implant prosthodontics in Brookfield, Wisconsin.
