PROGRAM DESCRIPTION:
This program will concentrate on treatment guidelines for the achievement of aesthetics in implant dentistry. The top-down treatment planning approach to case preparation will be emphasized and advanced technologies focused on tissue contouring and preservation will be highlighted. This approach to treatment planning affords clinicians with the opportunity to deliver optimal aesthetic outcomes to their patients in oral rehabilitation.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:

- Learn surgical techniques for immediate implant placement, immediate loading, and delayed loading protocols with and without simultaneous regeneration.
- Have a working knowledge of the clinical benefits of implant designs, implant surface characteristics, and new technologies to optimize outcomes.
- Learn treatment guidelines for obtaining aesthetics in implant therapy.
- Comprehend the value of using a top-down treatment planning approach to case preparation.
- Learn about advanced technologies for developing and sustaining aesthetic restorations supported by dental implants.

Robert del Castillo, DMD
Dr. del Castillo received his dental degree and his Certificate in Periodontics from Tufts University, School of Dental Medicine. He has served as an Adjunct Professor, Department of Periodontics at Tufts University School of Dental Medicine and a guest lecturer at Maryland University Dental School. Dr. del Castillo is affiliated with the American Academy of Periodontology. He maintains a private practice, limited to periodontics with a strong emphasis on implant and regenerative therapies, in Miami Lakes, Florida.
