*This chart is intended to be used as a guide only. Improper drill use may lead to premature wear and the need to replace the drill prior to 15 uses.

NOTE: Surgical instruments are susceptible to damage for a variety of reasons including but not limited to: prolonged use, misuse, rough or improper handling, inadequate cleaning, etc. Care must be taken to avoid compromising the intended performance of the instrument. Please refer to P-IFSCSS for complete instructions on the sterilization and care of stainless steel.
