Puros® Cortico-Cancellous Particulate Allograft

1. The Natural Mix For Healthy Bone Growth
   Puros Cortico-Cancellous Particulate Allograft has been designed to provide an anatomic-based mix of 70% cortical and 30% cancellous bone particulate to simplify your grafting process.

2. Easy To Use
   Retains osteoconductive properties due to the preservation of the natural bone matrix collagen and mineral composition, trabecular pattern and original porosity.
   Easy handling—quick hydration, five-year shelf life and room-temperature storage.
   No need to mix on site.

3. A Trustworthy Source
   Safety and performance you expect from the Puros brand.
   Single donor vials.
   Two particulate sizes to accommodate different defect sizes.

The Best of Both Worlds.
Puros Cortico-Cancellous Particulate Allograft

Sterilized and preserved using the proprietary Tutoplast® process, Puros Cortico-Cancellous Particulate Allograft is a high-quality allograft designed for large and small volume bone regeneration procedures.

Accuracy Assured

Convenient Packaging

The Unique Tutoplast Process

The proprietary Tutoplast process assures a high standard of tissue safety and quality with minimal risk of disease transmission.

The process preserves the valuable collagen matrix and tissue integrity while inactivating pathogens and gently removing unwanted materials, such as cells, antigens and viruses. The result is safe, biocompatible tissue.

For over 40 years, a variety of Tutoplast processed tissues have been safely used in more than five million procedures.¹
