Avoiding Complications in Same-Day Guided Immediate Placement and Provisional Restoration Using Guides and Improved Digital Workflow

**LIVE CE WEBCAST**

**PROGRAM DESCRIPTION:**
Patients with debilitated or missing dentition often seek rehabilitation to quickly regain masticatory function, aesthetics, and quality of life. Clinicians can now predictably offer treatment solutions for both single-tooth and immediate full-arch restorations to meet patient demands and expectations. This program will show participants a step-by-step, practical approach to delivering provisional prostheses on the day of implant placement with reliable accuracy; definitive prostheses can be fabricated and delivered in an appropriate timeframe.

**PROGRAM OBJECTIVES:**
At the completion of the program, participants should be able to:

- Discuss new ways to manage treatment planning and communication between the surgeon, restorative dentist, and laboratory.
- Describe a comprehensive guided surgery system that is based on the aesthetic tooth position and facilitates the ability to provide a provisional restoration at the time of surgery.
- List the advancements in the industry that have led to greater efficiencies and improved accuracy through digital workflows.
- Explain the tips and tricks for taking a digital impression with the latest in intraoral scanning technology.

**DATE/TIME:** May 28, 2020
2:00 – 3:30 pm EDT (New York)
1:00 pm (CDT), 12:00 pm (MDT), 11:00 am (PDT)
