The way it fits together is what sets it apart.
Spline impression transfer, cement-retained and custom restorative components.

Impression-Taking

3.25mmD Platform

4.0mmD Platform**

5.0mmD Platform

Impression Posts
(w/ screw)
(Standard, Short & Narrow)

Implant Body Analogs

Cement-Retained Restorations

Temporary Abutments
(engaging & non engaging)
(w/ screw)

Fixed Abutments
(w/ screw)

Fixed Abutments,
Preangled 17°
(w/ screw)

Custom Restorations

Direct Gold Copings, Engaging
(w/ sleeve & screw)

Direct Gold & Plastic Copings,
Non-Engaging
(w/ sleeve & screw)

*4.0mmD platform transfers also available with 5.5mm flare. Note: For open-tray impressions, use open-tray retaining screw, part # 1833.

*Note: Wider flare also available.

**Note: Spline Twist™ 3.75mm implants feature a 4.0mmD platform.
Spline screw-retained and overdenture restorative components.

**Screw-Retained Restorations**

**Color-Coding for Spline**

The chart below indicates which color corresponds to each Spline platform diameter.

- **Yellow** 3.25mm
- **Blue** 3.75mm & 4.0mm
- **Green** 5.0mm
- **Black** Common products that are compatible with more than one diameter (i.e. 3.25mm & 4.0mm).
Spline Prosthetics
Simple procedures and optimal esthetics.

Zimmer Dental offers a full range of easy to use components to meet all your restorative needs. The high-strength Spline Implant interface allows the implant and the abutment to form a precise “lock,” reducing joint failure.

- **Spline** connection has been proven stronger than external hex designs.¹⁻³
- Interdigitating projections & slots provide exceptionally precise fit.
- Enhanced sense of engagement.
- Solves rotational problems and reduces micromovement.⁴⁻⁶

Choosing a Diameter and Flare
Use this diagram and chart as a guide in determining implant diameter and flare options for the tooth or teeth being restored.

### Implant Diameter & Flare Options
