Interdisciplinary Approach for Treating the Esthetically Compromised Patient

LIVE CE WEBCAST

PROGRAM DESCRIPTION:
Treatment planning of complex cases requires the highest level of knowledge and skill of the treating team. It is an orchestration of procedures including proper sequencing and timing that makes the difference. An envisionment of the final case before starting is required to know where the goal of treatment will be directed. This, in conjunction with the patient’s needs and clinical situation comprise the decision-making process for what is the best treatment for the patient. In this program, problems and concerns facing the team will be addressed in this interdisciplinary approach to the most challenging cases.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:

- Know how to deal with problems facing the team such as which teeth to save or extract.
- Have an understanding of whether to place implants immediately or in a delayed protocol.
- Decide if multiple implants should be placed in the aesthetic zone.
- Comprehend when and how to include orthodontics if needed for sight development.
- Describe if the case should be splinted or broken up into separate bridges or individual teeth.
- Have a working knowledge of how to provisionalize the case throughout treatment.

Dennis P. Tarnow, DDS
Dr. Tarnow received his dental degree and completed postdoctoral programs in periodontics and prosthodontics at New York University. He is currently Clinical Professor of Periodontology and Director of Implant Education at Columbia School of Dental Medicine, and the former Professor and Chairman of the Department of Periodontology and Implant Dentistry at New York University College of Dentistry. Dr. Tarnow has a certificate in Periodontics and Prosthodontics and is a Diplomate of the American Board of Periodontology. He is a recipient of the Master Clinician Award from the American Academy of Periodontology, Teacher of the Year Award from New York University, and Distinguished Lecturer Award from the American College of Prosthodontists in 2015. Dr. Tarnow has a private practice in New York City, and has been honored with a wing named after him at New York University College of Dentistry. He has published more than two hundred articles on perio-prosthodontics and implant dentistry and has coauthored three textbooks including one titled Aesthetic Restorative Dentistry. Dr. Tarnow has lectured extensively in the United States and internationally in over forty-five countries.
