Provisional Components

Certain® And External Hex Implants
Provisional Components’ Advantages

Versatile Solutions For Patients Who Demand More Choices And Faster Results

Ease Of Use And Versatility

• Components can be immediately customized to a patient’s anatomical profile
• Components are made of polymer material for easy preparation

Prosthetic Flexibility

• Available for implant and abutment-level provisional restorations
• Available in internal and external hex connections

PreFormance® Post

• For use with cement-retained restorations
• Available in straight or 15° pre-angled for easy angle correction
• Smooth surface for easy provisional reline
• Flat side for anti-rotation

Temporary Cylinders

• Indicated for screw-retained restorations
• Knurled surface for mechanical retention of resin restorative material
• Available in hexed and non-hexed for single or multiple-unit restorations

QuickBridge® Titanium Cylinder And Peek Cap

• Provide a simple solution for the fabrication of multiple-unit, provisional restorations on definitive Low Profile Abutments
• All components are compatible with straight and angled Low Profile Abutments
• Ability to provisionalize chairside
Provisional Components’ Case Studies

PreFormance Provisional Case Study By: Dr. Harold Baumgarten†, Philadelphia, PA

If you seek aesthetic implant level provisional restorations, PreFormance Provisional Components may be customized chairside or at the laboratory for specific contours and anatomic profiles.

QuickBridge Provisional Case Study By: Dr. Pär-Olov Östman†, Falun, Sweden

Clinicians who prefer screw-retained definitive restorations but want the simplicity and cost effectiveness of cement-retained immediate or delayed provisional bridges, may find QuickBridge Provisional Components an ideal choice.
