PROGRAM DESCRIPTION:
Patients with debilitated or missing dentitions often seek rehabilitation to quickly regain masticatory function, aesthetics, and quality of life. Clinicians can now predictably offer treatment solutions for immediate full-arch restorations to meet patient demands and expectations. This program will show participants a step-by-step, practical approach to delivering provisional prostheses on the day of implant placement. Design and fabrication of the definitive prosthesis will also be discussed, as well as the appropriate timeframe for delivery.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
• Identify potential candidates for immediate full-arch restorations.
• Diagnose and develop a treatment plan for these procedures.
• Communicate the benefits of this treatment to gain patient acceptance.
• Fabricate an immediate full-arch provisional restoration following the RevitaliZe® Guidelines.

James Rivers, DDS, MHS
Dr. Rivers received his dental degree, Masters in Health Science degree and graduate prosthodontics training at Medical University of South Carolina. He recently retired from dental academics after thirty-five years of service. Dr. Rivers is the recipient of numerous awards for his contributions to dental education, to the profession, and his community, and is an active member of several professional organizations. He has presented more than 500 lectures nationally and internationally on all aspects of dental implant restorative procedures.
