Brought To You By

PROGRAM DESCRIPTION:
This program will cover several aspects of implant dentistry to guide dentists in optimizing implant therapy for partially edentulous patients. Participants will gain the general understanding necessary for development of a treatment plan for multiple edentulous cases. Special considerations will be discussed as to how to choose the ideal implant and optimal components for a given case while ensuring a stable and aesthetic result. A coded abutment impression system and numerous options associated with its use will also be covered.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
• Understand treatment options and treatment planning considerations.
• Choose the best implant and the best components for each clinical case.
• Understand the advantages and limitations of different implant solutions.
• Understand how to optimize treatments with the BellaTek® Encode® Impression System
• Understand how digital solutions could be used in implant dentistry.

Pierre-Luc Michaud DMD, MSc, FRCD(C)
Dr. Michaud is an Assistant Professor of Prosthodontics at the Dalhousie University Faculty of Dentistry in Halifax, Nova Scotia, Canada. He received his dental degree from Université de Montréal. He then joined the University of Toronto for a GPR program, and later completed a Residency in Prosthodontics at Université de Montréal. Dr. Michaud is the course director for the Prosthodontics 4 course at the Dalhousie Faculty of Dentistry. He maintains a private practice in the intramural Faculty practice, where he covers all aspects of prosthodontics. He is also a fellow and examiner of the Royal College of Dentists of Canada in Prosthodontics and he serves as a member of the Journal of Prosthetic Dentistry’s Editorial Review Board.
