

CE WEBCAST

This program will illustrate and explain the four main implant loading protocols available to clinicians, including unloaded healing (two-stage protocol), unloaded healing, early loading (single-stage protocol), immediate occlusal loading (full arch), and immediate non-occlusal loading (single-unit implant-supported restorations).

After completion of the program, participants should be able to:

- Define unloading healing, early loading, immediate full-arch occlusal loading and immediate non-occlusal loading for single- and two-unit implant restorations.
- Identify clinical indications and contraindications for each specific loading protocol.
- Prescribe specific diets, oral hygiene and maintenance procedures for each loading protocol.
- Identify the logistics associated with each loading protocol including laboratory and surgical collaboration, appointment sequencing, and identifying the required implant components to have on hand for each protocol and procedure.

Carl Drago, DDS, MS, FACP

Dr. Drago received his dental degree from Ohio State University College of Dentistry and a Master's Degree from the University of Texas Graduate School of Biomedical Sciences at San Antonio, Texas. Dr. Drago is a Diplomate of the American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the American College of Dentists. He has more than 80 published articles and has written four textbooks on dental implants. Dr. Drago currently serves as the Clinical Science section editor for the Journal of Prosthodontics. He is as Adjunct Associate Professor in Graduate Prosthodontics at Marquette University School of Dentistry and maintains a private practice limited to fixed, removable, and implant prosthodontics in Brookfield, Wisconsin. †
