The Digital Solution: Planning and Restoring Dental Implants

LIVE CE WEBCAST

PROGRAM DESCRIPTION:
This program will discuss the benefits of CAD/CAM abutments for the fabrication of patient specific implant-supported restorations. Benefits and limitations of scanners currently available will be discussed, along with design principles used in CAD/CAM abutment design. This program will educate and motivate attendees to take advantage of today’s implant technologies in the dental practice.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
- Develop a strategy to utilize new technologies for more predictable patient outcomes.
- Understand how to provide treatment based upon the patient’s needs while reducing chairtime and achieving enhanced aesthetic outcomes.
- Understand the time savings associated with intraoral scanning versus conventional impressions.
- Train dental assistants to accurately scan healing abutments.

Steven Glassman, DDS
Dr. Glassman received his dental degree from Columbia University School of Dental and Oral Surgery. He is an internationally recognized speakers on digital scanning and implant restorations. Dr. Glassman provides unsurpassed general dentistry, cosmetic dentistry and restorative dentistry, paving the way in the field. Dr. Glassman currently maintains a private practice with his wife, Dr. Debra Glassman, in Manhattan, New York.

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPAR ENCY REPORTING: All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD $50.

The information being presented is of a general nature and is for dental education purposes only. The information includes descriptions of conditions that a healthcare professional may encounter and treatment options that may be considered for those conditions. Because this information does not purport to constitute any diagnostic or therapeutic statement with regard to any individual medical/dental case, each patient must be examined and advised individually, and this information does not replace the need for such examination and/or advice in whole or in part. Each healthcare professional should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this information does not purport to replace the comprehensive training clinicians have received.
