

## Please join us for this innovative educational program.

The **zbi**pathwayZ™ Program offers interactive education and comprehensive training in all aspects of restorative implant dentistry. This four (4) session educational continuum provides the tools, skills, and confidence to successfully incorporate dental implant therapy into the restorative practice. Twenty-eight (28) hours of continuing education credits will be awarded for live participation, as well as additional credit hours for self-study activities.

This program focuses on patient education and identification of candidates for implant therapy, through diagnosis, treatment planning, and fabrication of provisional restorations through definitive restorations. Participants will follow patients through the dental implant treatment process during the course of the program. By training the dental implant team, confidence and new skills are developed.
