PROGRAM DESCRIPTION:
Delivering aesthetic implant restorations on a predictable basis can be challenging. Immediate implant placement and immediate restoration have allowed clinicians to maximize aesthetic results for their patients while expediting their therapy. This program will review digital smile design, treatment planning considerations, implant selection, implant placement, and immediate restoration of dental implants in the aesthetic zone.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:

- Understand the proper placement of implants into extraction sockets.
- Describe how to fabricate provisional restorations.
- Understand the relationship between digital smile design and proper implant placement.
- Understand how to use CBCT scans in the planning process.

Harold Baumgarten, DMD
Dr. Baumgarten received his dental degree, as well as Certificates in Periodontal Prosthetics and Periodontics, from the University of Pennsylvania, School of Dental Medicine. He is an active member of several professional associations and is on the Editorial Board of the Compendium of Continuing Education in Dentistry. Dr. Baumgarten is a Clinical Professor with the Department of Periodontics at the University of Pennsylvania, and Clinical Director of Periodontal Prosthesis. He maintains a private practice focused on implant and reconstructive therapy in Philadelphia, Pennsylvania.
