Patients with debilitated dentition or who are edentulous, often seek rehabilitation with implant therapy to quickly regain their confidence and quality of life. Immediate full-arch restoration can be an excellent solution for meeting patient demands and expectations. This program will provide an overview of this treatment modality and demonstrate a step-by-step, practical approach to delivering provisional full-arch prostheses on the day of implant placement, and later creating an aesthetic, functional definitive prosthesis.

**PROGRAM OBJECTIVES:**
At the completion of the program, participants should be able to:

- Understand the scientific basis for immediate occlusal loading of edentulous jaws.
- Determine which patients are the best candidates for immediate full-arch therapy.
- Develop a plan for fabricating an immediate full-arch provisional restoration with the aid of the RevitaliZe® Guidelines.
- Understand the components required and procedures for fabrication of the definitive prosthesis.

**Geoffrey Cunningham, DDS, MS, FACP**
Dr. Cunningham received his DDS and his MS in Prosthodontics from West Virginia University in Morgantown, West Virginia. He is a diplomate with the American Board of Prosthodontics and is the current owner and president of a prosthodontics practice in Durham, North Carolina. His practice focuses on reconstructive dentistry where he typically treats patients requiring complex multidisciplinary rehabilitation involving implant, fixed, and removable prosthodontics. Dr. Cunningham lectures nationally and is an adjunct professor at the University of North Carolina at Chapel Hill.

**DATE/TIME:**
On-Demand Viewing

**REGISTRATION AND CANCELLATION POLICY:**
Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

**TRANSPARENCY REPORTING:**
All payments and “transfer of value” items provided to health care providers will be reported as required by federal and state laws and regulations. “Transfer of value” items include meals and continuing dental education credits. “The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD $50.

**DISCLAIMER:**
Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
