

Same-day Guided Immediate Placement and Provisionalization using an Improved Digital Workflow Hands-on Workshop

Speaker: Brent Boyse, DDS

ZIMMER BIOMET
Institute

PROGRAM DESCRIPTION:

Patients with debilitated or missing dentition often seek rehabilitation to quickly regain masticatory function, aesthetics, and quality of life. Clinicians can now predictably offer treatment solutions for both single-tooth and immediate full-arch restorations to meet patient demands and expectations.

This program combines didactic and hands-on training to show participants a step-by-step, practical approach to deliver provisional prostheses on the day of implant placement with reliable accuracy; definitive prostheses can be fabricated and delivered in an appropriate timeframe.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Learn new ways to manage the treatment planning and communication between the surgeon, referral and lab
- Become familiar with a comprehensive guided surgery system that is based on the aesthetic tooth position and facilitates the ability to provide a provisional restoration at the time of surgery
- Understand how advancements in the industry have led to greater efficiencies and improved accuracy through digital workflows
- Gain tips and tricks for taking a digital impression with the latest in intraoral scanning technology

BRENT R. BOYSE, DDS
