PROGRAM DESCRIPTION:
Delivering aesthetic implant restorations on a predictable basis can be challenging. Immediate implant placement and immediate restoration have allowed clinicians to maximize aesthetic results for their patients while expediting their therapy. This program will review digital smile design, treatment planning considerations, implant selection, implant placement, and immediate restoration of dental implants in the aesthetic zone.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
- Understand the proper placement of implants in extraction sockets.
- Describe how to fabricate provisional restorations.
- Understand the relationship between digital smile design and proper implant placement.
- Understand how to use CBCT scans in the planning process.
