Zimmer Biomet Institute

Dates: 22 – 23 November 2019

Course Hours: Friday, 14.45 – 19.00 / Saturday, 8.30 – 16.00

Title: Cadaver Course – Advanced Bone and Soft Tissue Grafting for Implant Esthetics and Function

Speaker: Dr. Francesco Amato

Level: Advanced

Course Venue: Facultad de Medicina, C/Casanova, 143, 08036 Barcelona, Spain

Abstract

Implant therapy in the esthetics zone has become in the last years a very common and demanding treatment solution for our patients.

The clinicians need to control advanced surgical treatment planning and advanced soft and hard tissue management techniques to achieve the highly aesthetic results our patients are aiming for.

This course composed of a well structured lecture part on Friday and a hands-on cadavers on Saturday, reviews all the advanced planning and surgical treatment techniques to treat multiple types of edentulism and bone defects to achieve optimal long lasting esthetics results.

Course Objectives

This advanced course aims the real feel of a clinical setting through the use of cryopreserved human specimens. The soft and hard tissue of the specimen reacts as it would in a live patient's mouth to provide a more realistic experience. Unlike what you may have experienced in other courses, where the bone is of styrofoam quality.

During this very didactic course the participants have the opportunity to learn and apply on a real mouth setting an endless set of planning and treatment techniques like atraumatic tooth extraction, soft tissue grafting and management techniques, suturing, bone augmentation procedures with different grafting materials and membranes, including immediate implant placement.

Level Advanced	Lecture & Hands-on Workshop	Date 22 – 23 November 2019	Course Hours Friday, 14.45 – 19.00 Saturday, 8.30 – 16.00	Class Size Maximum 16 (2 participants on 1 specimen)	Course Fee ¹⁾ 950 EUR	Course Language English
