Dental implants are highly predictable when treatment protocols are followed. Peri-implantitis is a disease that threatens implant survival long-term. For clinicians, there is no clear consensus on how to prevent and treat this fast-growing problem. This presentation will provide an overview of the diagnosis of peri-implant disease and treatment considerations. The decision tree for different treatment modalities will be highlighted, including different prosthetic treatment options including CAD/CAM restorations to optimize plaque control and maintain health around implant-supported restorations.

**PROGRAM OBJECTIVES:**

At the completion of the program, participants should be able to:

- Recognize and diagnose peri-implantitis.
- Identify the risk factors for implant disease.
- Demonstrate different surgical approaches including regenerative therapy for treating peri-implantitis.
- Discuss different prosthetic concepts and CAD/CAM abutment designs to control and prevent peri-implantitis to maintain long-term peri-implant health.

Suheil Boutros, DDS, MS

Dr. Boutros received his dental degree from University of Detroit, Mercy School of Dentistry, Detroit, MI, and a Masters of Science and Certificate in Periodontics from University of Minnesota, School of Dentistry, Minneapolis, MN. He is a Visiting Assistant Professor in the Department of Periodontics, University of Michigan, School of Dentistry, Ann Arbor, MI. Dr. Boutros has numerous publications in the peer-reviewed literature and is in private practice in Grand Blanc, Clarkston, and Dearborn Heights, MI with an emphasis on periodontics, implants, and regenerative therapy.

**DATE/TIME:**
On-Demand Viewing

**REGISTRATION AND CANCELLATION POLICY:**
Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

**TRANSPARENCY REPORTING:**
All payments and “transfer of value” items provided to health care providers will be reported as required by federal and state laws and regulations. “Transfer of value” items include meals and continuing dental education credits. The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD $50.

**DISCLAIMER:**
Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
