## Avoiding Implant Complications - New Guidelines for Prevention and Management

### PROGRAM DESCRIPTION:

This program will discuss new guidelines and protocols for avoiding potential implant complications—from aesthetics to peri-implant disease. Current classification of sockets, management, socket grafting, and immediate implant placement in the aesthetic zone will be reviewed. The selection of grafting materials, technique, and the concept of “dual-zone grafting” will be explored in detail. This program will also address the pathogenesis of peri-implant infections and the various types of infections. Current guidelines for the management of peri-implant mucositis, as well as prevention and treatment of peri-implantitis, will be discussed in detail. Lastly the unique clinical presentation of retrograde peri-implant infections and their management will be reviewed.

### PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe new guidelines to prevent and manage implant aesthetic complications.
- Perform rescue procedures to manage aesthetic complications.
- Characterize the latest in socket grafting and ridge augmentation.
- Define peri-implant infections (peri-implant disease and RPI).
- Employ prevention and management protocols for peri-implant infections.
