

# Hierarchy of Space Considerations for Implant Restorative Therapy

LIVE CE WEBCAST

## PROGRAM DESCRIPTION:

All too often, implant-supported restorations, whether large or small, are designed and fabricated only to find upon insertion that there is inadequate space for the definitive restoration. This leads to complications such as structural insufficiency, poor contours, unsatisfactory aesthetics and issues with phonetics. The purpose of this presentation is to propose a systematic clinical approach which highlights the importance of pre-treatment three-dimensional restorative space assessment and its critical clinical relationship to the decision making process when choosing various implant prosthetic designs.

**Program Fee**  
Complimentary

**CE Credit**  
1

## PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Understand why pre-treatment three-dimensional restorative space assessment should be mandatory for all proposed implant treatment.
- Learn that when there are *reduced* restorative dimensions, potential complications with definitive implant-supported prostheses may occur.
- Understand that when there are *excessive* restorative dimensions, potential complications with definitive implant-supported prostheses may occur.
- List the minimal space requirements for all types of implant-supported restorations, whether screw or cement-retained and for cases as small as a single-tooth implant-supported restoration, or as large as full arch treatment.

## David H. Moed, DDS

Dr. Moed received his Doctorate of Dental Surgery from the State University of New York at Buffalo School of Dental Medicine and attained his Prosthodontic Specialty Certificate from New York University College of Dentistry in New York, New York. Dr. Moed is the past President of the Scarsdale Dental Society, a member of the American Dental Association, the Academy of Osseointegration, the Scarsdale Dental Society, New York State Dental Association, and the 9th District Dental Society. He is currently an on-call professor in the Prosthodontic Department at New York University College of Dentistry. Dr. Moed maintains a private practice in White Plains, New York.

**ADA CERP®**  
Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at [ADA.org/CERP](http://ADA.org/CERP).

Zimmer Dental Inc.  
Nationally Approved PACE Program  
Provider for FAGD/NAGD credit.  
Approval does not imply acceptance by  
any regulatory authority or AGD endorsement.  
01/19/2015 to 12/31/2018  
Provider ID# 208673

**REGISTRATION AND CANCELLATION POLICY:** Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.  
**TRANSPARENCY REPORTING:** All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. \*The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

The information being presented is of a general nature and is for dental education purposes only. The information includes descriptions of conditions that a healthcare professional may encounter and treatment options that may be considered for those conditions. Because this information does not purport to constitute any diagnostic or therapeutic statement with regard to any individual medical/dental case, each patient must be examined and advised individually, and this information does not replace the need for such examination and/or advice in whole or in part. Each healthcare professional should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this information does not purport to replace the comprehensive training clinicians have received.
