

Zimmer® Plastic Temporary Abutments

soft tissue management with esthetics in mind

1 extensive selection

- Available in ready-to-use 1mm or 4mm cuff heights for customization
- Straight and angled options enable selection of the optimal abutment for each individual case
- Conveniently packaged with both processing and retaining screws for use in cement or screw-retained restorations

2 uncomplicated and adaptable

- Plastic polymer material that is easily modified
- Chair-side preparation that is both brief and cost-effective

3 compatible

- PEEK™ plastic polymer, offered in a natural tooth color, bonds well with common temporary crown materials including acrylic and composite

preserve and maintain soft tissue contours for better outcomes

Zimmer® Plastic Temporary Abutments are a new, improved and expanded product line for use with the *Tapered Screw-Vent®* and *Screw-Vent®* Implant Systems for 3.5mm, 4.5mm and 5.7mm platforms.

New angled abutments enhance your ability to provide the optimal solution

benefits of Plastic Temporary Abutments

- A simple, esthetic and long-term solution for soft tissue management during the healing period
- Support for the temporary restoration by preserving and maintaining soft tissue contours to create a natural emergence profile and a foundation for a better esthetic result
- Expanded indication up to 180 days in the mouth
