

# Are Xenograft Bone Materials still the answer? An introduction to options with added benefit

Evening of Education by Zimmer Biomet

## PROGRAM DESCRIPTION:

This evening programme will introduce attendees to Zimmer Biomet's extensive regenerative product portfolio including allografts, xenograft and synthetic options. The lecture focuses on product-specific properties of different bone graft materials and shows how the choice of material can affect the clinical outcome in dental indications. Based on scientific information the differences between defect repair and regeneration will be elaborated showing clear pathways to achieve true regeneration of vascularized, vital bone rather than bone-like bone structures.

**REGISTRATION FEE:**  
Complimentary

Attendees will also have the opportunity to ask questions and handle the products during the evening

## PROGRAM OBJECTIVES:

On the completion of the program, participants should be able to:

- Understand the regenerative product options offered by Zimmer Biomet
- Understand bone graft properties, differences and protocols
- Know the difference between defect repair and regeneration
- Have further knowledge of the impacts on clinical outcome when choosing graft materials.

### Dr Stefan Berger

Marketing Manager, Regenerative Solutions EMEA Dental

Stefan Berger, Zimmer Biomet's Marketing Manager, Regenerative Solutions EMEA based in Germany. He has a diploma in Biomedical Engineering and a doctorate in material sciences.
