PROGRAM DESCRIPTION:
Clinicians face many challenges that may compromise successful implant outcomes. Systemic conditions, various medications may create situations that decrease implant success. In this lecture, Dr. Sameer Kaura will share with us clinical cases and his experience is placing Trabecular Metal implants in poor bone quality, and in medically compromised patients. He will also share his experience with Tapered screw vent implants highlighting their key advantages. The selection of the proper implant is crucial for achieving positive results for patients.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
• Understand the line of management on patients with various health complications and achieve successful dental implant placement.
• Develop treatment plan options that encompass patient preferences with successful functional and aesthetic outcomes.
• Understand the attributes of an implant that may be beneficial in different challenging clinical situations.
• Know the indications for Trabecular metal and Tapered screw vent implants in different clinical situations.
