

Implant Maintenance and Follow-Up Care for the Full Arch

LIVE CE WEBCAST

PROGRAM DESCRIPTION:

Full arch implant treatment has become a well-accepted treatment modality for edentulous patients and patients with terminal dentitions. The frequency of peri-implant mucositis and peri-implantitis has been increasing and now presents different challenges for the dental implant team. This program will define and illustrate peri-implant mucositis and peri-implantitis, as well as describe and illustrate specific recare protocols. Clinical cases will be presented, along with current recommendations for continuing care from the professional literature.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Define peri-implant mucositis and peri-implantitis.
- Recognize the signs of peri-implant mucositis and peri-implantitis.
- Describe the benefits and limitations of cement- and screw-retained implant restorations.
- Establish specific recare protocols based on recognized clinical guidelines.

Carl Drago, DDS, MS, FACP

Dr. Drago received his DDS from The Ohio State University College of Dentistry and MS from the University of Texas Graduate School of Biomedical Sciences at San Antonio. Dr. Drago is a Diplomate of the American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the American College of Dentists. He has more than 90 published articles and has written five textbooks on dental implants. Dr. Drago currently serves as the Clinical Science section editor for the Journal of Prosthodontics. He is an Adjunct Associate Professor in Graduate Prosthodontics at Marquette University School of Dentistry. He maintains a private practice limited to fixed, removable, and implant prosthodontics in Brookfield, Wisconsin.
