

ZBI LIVE CASE PRESENTATIONS

Identification and Treatment of Peri-Implant Disease

COMPLIMENTARY LIVE CE VIRTUAL PROGRAM

PROGRAM DESCRIPTION:

Dental implants are highly predictable when treatment protocols are followed. Peri-implantitis is a disease that threatens implant survival long-term. This presentation will provide an overview of the various stages of peri-implant disease—from peri-implant mucositis to peri-implantitis. The clinical cases to be presented in this program will demonstrate identification and treatment for various stages of peri-implant disease. The procedures will be presented and explained, using clinical records, radiographs, models, and photographs. The criteria for selection of materials and technologies, and alternatives, will be discussed as they are relevant to each case. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify the stages of peri-implant disease.
- Describe step-by-step protocols for treating peri-implant disease at various stages.
- Understand how to treat some cases of disease with debridement and grafting procedures.
- Identify when a failed implant should be explanted and understand why placement of a Trabecular Metal™ Dental Implant may be indicated.

Monish Bhola, DDS, MSD

Dr. Bhola received a dental degree from University of Detroit Mercy School of Dentistry and a Certificate and Master of Science in Periodontics and Implantology from Indiana University School of Dentistry. He is a Diplomate of the American Board of Periodontology. Dr. Bhola is the former Director of Post-Graduate Periodontics at the University of Detroit Mercy School of Dentistry and is currently Director of the Advanced Periodontics Institute, a clinical and education center in Michigan, USA. He is a world-renowned clinician and educator with twenty-seven years of clinical experience and has been featured in several national and international news articles. Dr. Bhola has more

than thirty publications in peer-reviewed journals. His areas of interest include dental implants, oral plastic surgery, and advanced bone and soft tissue grafting for teeth and implants.
