

# ZBI CASE PRESENTATIONS

## Predictable Anterior Aesthetics

### ON-DEMAND CE VIRTUAL PROGRAM

#### PROGRAM DESCRIPTION:

Achieving optimal results when treating patients with implant therapy in the aesthetic zone can be challenging. Proper treatment planning and the decision making process is key to achieving predictable aesthetic outcomes for immediately loaded as well as staged implant therapy. In this program, multiple case examples will be presented demonstrating optimal treatment for patients presenting with various, challenging clinical situations. An understanding of prosthetic space requirements for implant-supported restorations will be discussed, as well as, the benefits of digital impressions, through fabrication of custom provisional and definitive prostheses.

#### PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe how to take digital impressions of the BellaTek<sup>®</sup> Encode<sup>®</sup> Healing Abutment.
- Understand how to utilize custom impression posts.
- Fabricate custom provisional restorations.
- Describe when to utilize custom titanium abutments vs. zirconia restorations.

#### Matthew Young, DDS

Dr. Young earned a dental degree at the University of Buffalo, graduating with honors. He completed the General Practice Residency Program at the Albert Einstein Medical Center in Philadelphia, PA, where he also served as an attending clinician. Dr. Young has more than fifteen years experiencing placing and restoring implants in private practice. He is a Diplomate of the American Board of Oral Implantology, an Honored Fellow of the American Academy of Implant Dentistry, and also served as its Western District President, Board of Trustees, Admissions and Credentials Board, Education Committee Board, and Annual Meeting Program Chair. Dr. Young is the founder of the Bay Area Implant Synergy Study Group. He lectures nationally and internationally on implant dentistry and cosmetics, while maintaining a private practice in Downtown San Francisco.
