

The Missing Bone at 360 Degrees

The GBR as the Solution for Limited Bone Defect and Severe Atrophy

Dr. Marco Ronda

PROGRAM DESCRIPTION:

The introduction of two new surgical techniques on management of lingual and buccal flaps enhance reproducibility and validity of the GBR procedure, improving surgical predictability of this technique.

The new soft tissue management, good skills, the introduction of the concept of volumetric mass, and a necessary learning curve are changing the surgical and mental approach to GBR; perhaps it could be considered a technique non-sensitive to the ability of the operator but sensitive to his / her knowledge.

SPEAKER

Dr. Marco Ronda*

Graduated in medicine in 1990 at the University of Verona and since then he practices dentistry at his private practice in Genoa. Among the many post graduate courses he attended the one-year-course advanced surgery held by Prof. Massimo Simion in Milan (2001) and attended a Master course in Regenerative Surgical Techniques at the University of Pennsylvania (2003). He annually attends the meetings organized by the American Academy of Implant Dentistry and several

specialized courses on the techniques of horizontal and vertical bone regeneration. He also participates annually at the Continuing Dental Education at the New York University College of Dentistry , Post Graduate. From 2011 he is speaker at the Post Graduated Course at the University of Modena and Reggio Emilia. He published in 2011 in the IJPRD his study reporting a new surgical technique of lingual flap management appropriate in all cases of increase in bone volume and in 2014 he published in the IJPRD also a new clinical study on the management of buccal flap titled "A novel approach for the coronal advancement of buccal flap ". During the years he attended national and international courses and congress as a speaker as in (NYU , EAO, AAED). Active member of the Italian Academy of Osseointegration.

* Dr. Marco Ronda has, or in the last 2 years had, financial relationships with Zimmer Biomet Dental , resulting from speaking engagements, consulting engagements and other retained services.
