

Rehabilitation of Medically Compromised Patients with Dental Implants: A Five-Year Follow-Up on Risk, Revision, and Time to Final Restoration

ON-DEMAND WEBCAST

PROGRAM DESCRIPTION:

Osteoporosis, oral cancer, and co-morbidities are on the rise. Patients with these conditions are most often denied dental implant therapy, due to lack of consensus on whether implant therapy can be done successfully. Trabecular Metal™ Technology has been used for more than two decades in orthopedic surgery, especially in patients with osteoporosis, cancer, and co-morbidities. The Trabecular Metal Dental Implant has been tested in animal models and human cases for more than five years. Clinical cases presenting the Trabecular Metal Dental Implant for enhanced secondary stability in poor bone quality, and in medically compromised patients will be presented, as well as revision and rapid recovery indications.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify patients at high risk for implant therapy based on medical conditions such as osteoporosis, oral cancer, and co-morbidities.
- Describe the implant placement protocol for rapid recovery from time of implant placement to the definitive restoration.
- Recognize implant complications and the indication for Trabecular Metal Implants used for Revision Therapy.
- Review the pertinent clinical studies supporting the efficacy of the Trabecular Metal Implant for revision, high risk, and rapid recovery therapies.

Suheil Boutros, DDS, MS

Dr. Boutros received his dental degree from University of Detroit, Mercy School of Dentistry, Detroit, MI, and a Masters of Science and Certificate in Periodontics from University of Minnesota, School of Dentistry, Minneapolis, MN. He is a Visiting Assistant Professor in the Department of Periodontics, University of Michigan, School of Dentistry, Ann Arbor, MI. Dr. Boutros has numerous publications in the peer-reviewed literature and is in private practice in Grand Blanc, Clarkston, and Dearborn Heights, MI with an emphasis on periodontics, implants, and regenerative therapy.
