

# Treatment Guidelines for Immediate Placement and Immediate Restoration in the Aesthetic Zone: Part II

## LIVE CE WEBCAST

Planning for a full-arch immediate provisional restoration should be a collaborative effort between the restorative dentist, surgical specialist, and technical laboratory. The aesthetic and functional requirements of the prosthesis must be considered when determining the number and locations of the implants providing support. The criteria for immediate function must be recognized and proper instructions given to the patient for postoperative care. This presentation will include discussion of these elements of full-arch provisional restorations.

After completion of the program, participants should be able to:

- List and describe the responsibilities of the restorative dentist, surgical specialist, and technical laboratory.
- Describe the steps in determining the best locations for implants and the number of implants required.
- Describe the considerations in making plans for an aesthetically pleasing and functional provisional restoration.
- List and describe the elements of postoperative instructions to be given to a patient who receives an immediate full-arch provisional prosthesis.
- Describe the alternatives that are available if it is not possible to deliver the immediate provisional restoration.

**Edward R. Schlissel, DDS, MS**

Dr. Schlissel received his dental degree from State University of New York (SUNY) at Buffalo, School of Dentistry in Buffalo, New York and his Materials Science degree from SUNY at Stony Brook, College of Engineering and Applied Sciences, in Stony Brook, New York. He is a Fellow of the Academy of General Dentistry and a member of the Academy of Osseointegration. Dr. Schlissel is currently Assistant Clinical Professor of Surgery in the Division of Oral and Maxillofacial Surgery, Department of Surgery at Emory School of Medicine in Atlanta, Georgia and Professor Emeritus of General Dentistry, School of Dental Medicine at SUNY at Stony Brook in New York. Dr. Schlissel currently maintains a private practice in Marietta, Georgia.†
