PROGRAM DESCRIPTION:
This two-day program is designed for specialists who are currently treating and wish to refine their clinical skills treating patients with full-arch rehabilitation. The concepts and techniques taught in this program will enable participants to surgically place angled implants and deliver full-arch immediate loaded screw-retained provisional restorations to patients.

Participants will learn a step-by-step, practical approach to placing and restoring implants as well as deliver provisional prostheses on the day of implant placement through a combination of didactic and hands-on training; definitive prostheses can be fabricated and delivered in an appropriate timeframe. Discuss the team concepts linking the surgical and restorative practices with the dental laboratory to deliver this advanced care in an efficient manner.

The hands-on exercises of this course will take place in a state-of-the-art Surgical Cadaveric Laboratory. This allows clinicians to perform real-life clinical scenarios on human tissue to achieve these types of procedures including the steps needed to fabricate immediate, functional, full-arch provisional restorations; surgical procedures. Definitive prosthesis design and fabrication will also be discussed.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
- Identify patients who are candidates for immediate full-arch restorations
- Grasp the key components of the clinical and surgical treatment planning and work-up involved in these cases
- Diagnose, treatment plan, and set up the requisite appointments/logistics for these procedures
- Communicate the treatment plan with surgical, restorative and laboratory professionals to create an effective team approach and optimal patient outcomes
- Plan and execute the surgery and restoration
- Understand these cases from the patient perspective
- Identify the appropriate restorative components needed for full-arch provisional restorations
- Fabricate an immediate full-arch provisional restoration by following the guidelines for Patient Solutions

DATE/TIME:
Friday, February 22, 2019
Saturday, February 23, 2019
Registration/Breakfast: 7:45 a.m.
Seminar: 8:00 a.m. – 5:00 p.m.

VENUE:
Zimmer Biomet Institute East
399 Jefferson Road
Parsippany, NJ 07054
