

# Understanding the Workflow from Impression to Definitive Restoration in a Fully Digital Implant World

ON-DEMAND WEBCAST

## PROGRAM DESCRIPTION:

The introduction of intraoral digital scanners for use with coded healing abutments has eliminated the need for traditional impressions. Instead, the scanner data can be used to create a three-dimensional digital model of a coded healing abutment in the patient's mouth. Abutment design can be greatly enhanced, and the interval between impression making and delivery of the computer-milled titanium definitive abutment/restoration can be significantly compressed. This program will review the steps involved in using intraoral scanning technology to create definitive, CAD/CAM patient-specific implant-supported restorations. Benefits and limitations of scanners currently available will be discussed, along with design principles used in CAD/CAM abutment design.

**Program Fee**  
Complimentary

**CE Credit**  
1

## PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe the critical differences between analog-based and fully digital-based implant dentistry.
- Describe the procedures involved in taking a digital implant impression with the BellaTek® Encode® Impression System.
- Have a working knowledge of the workflows necessary to create an implant-supported restoration from a digital impression and the associated time savings.
- Provide treatment based upon the patient's needs while reducing chairtime and achieving aesthetic outcomes.
- List the benefits of utilizing a fully digital workflow to create implant-supported restorations.

### David H. Moed, DDS

Dr. Moed received his Doctorate of Dental Surgery from the State University of New York at Buffalo School of Dental Medicine and attained his Prosthodontic Specialty Certificate from New York University College of Dentistry in New York, New York. Dr. Moed is the past President of the Scarsdale Dental Society, a member of the American Dental Association, the Academy of Osseointegration, the Scarsdale Dental Society, New York State Dental Association, and the 9th District Dental Society. He is currently an on-call professor in the Prosthodontic Department at New York University College of Dentistry. Dr. Moed maintains a private practice in White Plains, New York.

**ADA CERP®**  
Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Dental Inc.  
Nationally Approved PACE Program Provider  
for FAGD/MAGD credits.  
Approval does not imply acceptance by  
any regulatory authority or AGD endorsement.  
01/01/2019 to 12/31/2020  
Provider ID# 208673

**REGISTRATION AND CANCELLATION POLICY:** Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

**TRANSPARENCY REPORTING:** All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. \*The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

**DISCLAIMER:** Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
