PROGRAM DESCRIPTION:
Digital technologies have had a dramatic impact on all disciplines of dentistry, particularly in the fields of prosthodontics and surgery. The evolution of digital technologies has provided dental professionals with the possibility of following a completely digital workflow beginning from diagnostic treatment planning to prosthesis fabrication. Clinical data acquisition using intraoral scanners has bridged the digital gap between the clinical practice and the dental laboratory. While these latest digital tools offer new and different workflows compared to conventional techniques, it is imperative that clinical efficiency and restoration accuracy not be compromised. This presentation will provide a practical and pragmatic overview of the digital tools and technologies used in a modern prosthodontic practice. The use of intraoral scanners and workflows required for simple reconstructions to comprehensive full arch rehabilitations in both conventional and implant-based applications will be presented. Some of the challenges, limitations, and inefficiencies encountered utilizing new technologies will be described.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:

- Demonstrate the utilization of digital technologies in implant surgery and prosthodontics.
- Demonstrate the use of intraoral scanner with conventional crown bridgework and for implant-supported restorations.
- Review the accuracy, benefits, and limitations of intraoral scanners.
- Provide an overview of the digital workflow required in comprehensive fixed reconstructions.

DATE/TIMES: April 2, 2020
2:00 – 8:30 pm EDT (New York)
1:00 pm (CDT), 12:00 pm (MDT), 1:00 am (PDT)
7:00 – 8:30 pm EDT (New York)
6:00 pm (CDT), 5:00 pm (MDT), 4:00 pm (PDT)

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and “transfer of value” items provided to healthcare providers will be reported as required by federal and state laws and regulations. “Transfer of value” items include meals and continuing dental education credits. The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD $50.
