

Immediate and Definitive Restorations of the Edentulous Arch-Transitioning from the Provisional Restoration to the Definitive

CE WEBCAST

Patients with debilitated or missing dentitions often seek rehabilitation to quickly regain masticatory function, aesthetics, and quality of life. Clinicians can now predictably offer treatment solutions for immediate full arch restorations to meet patient demands and expectations. This is followed by the design, fabrication, and delivery of the definitive prosthesis. This program will present the step-by-step and appointment-by-appointment procedures for constructing and delivering the definitive prosthesis. Specific procedures are performed at each appointment to achieve a successful restoration. A post-delivery follow-up schedule that is essential for long-term success will be presented.

After completion of the program, participants should be able to:

- Plan the design, fabrication, and delivery of the definitive full arch prosthesis.
- Identify appointment type and length of time needed for efficient treatment.
- Learn the specific procedures that should be performed at each appointment.
- Understand and set-up a recare protocol for maintenance and follow-up care.

Jimmy Rivers, DMD, MHS

Dr. Rivers received his DMD, MHS, and graduate prosthodontics training at Medical University of South Carolina. He is the recipient of numerous awards for his contributions to dental education, to the profession, and his community. He has presented more than 500 lectures nationally and internationally on implant dentistry. Dr. Rivers has 35 years of experience treatment planning and restoring dental implants.†
