

ZBI LIVE CASE PRESENTATIONS

Planning and Restoring Dental Implants with Digital Technologies

COMPLIMENTARY LIVE CE WEBCAST

PROGRAM DESCRIPTION:

CAD/CAM abutments for the fabrication of patient specific implant-supported restorations offer numerous benefits, especially when coupled with intraoral scanning technology. Through multiple clinical case examples, CAD/CAM abutments/restorations will be presented in this program. Digital workflows and step-by-step restorative procedures will be presented, as well as currently available intraoral scanners, and design principles for CAD/CAM abutment fabrication. This program will educate and motivate attendees to take advantage of today's implant technologies in the dental practice. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently today.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Develop a strategy to utilize new intraoral technologies for more predictable patient outcomes.
- Understand how to provide treatment based upon the patient's needs while reducing chair time and achieving enhanced aesthetic outcomes.
- Understand the time savings associated with intraoral scanning versus conventional impressions.
- Take digital scans of BellaTek® Encode® Healing Abutments for fabrication of Patient Specific BellaTek Abutments and restorations.

Steven Glassman, DDS

Dr. Glassman received his dental degree from Columbia University School of Dental and Oral Surgery. He is an internationally recognized speaker on digital scanning and implant restorations. Dr. Glassman provides unsurpassed general dentistry, cosmetic dentistry and restorative dentistry, paving the way in the field. He currently maintains a private practice with his wife, Dr. Debra Glassman, in Manhattan, New York.

ADA CERP®

Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Biomet Dental
Nationally Approved PACE Program
Provider for FAGD/IMAGD credit.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
1/1/2019 to 12/31/2020
Provider ID# 205673

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and "transfer of value" items provided to health care providers will be reported as required by federal and state laws and regulations. "Transfer of value" items include meals and continuing dental education credits. *The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

The information being presented is of a general nature and is for dental education purposes only. The information includes descriptions of conditions that a healthcare professional may encounter and treatment options that may be considered for those conditions. Because this information does not purport to constitute any diagnostic or therapeutic statement with regard to any individual medical/dental case, each patient must be examined and advised individually, and this information does not replace the need for such examination and/or advice in whole or in part. Each healthcare professional should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this information does not purport to replace the comprehensive training clinicians have received.
