Retaining an overdenture with implants can greatly improve chewing function for the patient. With the Locator Overdenture Attachment from Zimmer Dental, patients are able to easily seat their overdenture, which will help prevent worn or destroyed attachments caused by improper seating. The Locator Overdenture Attachment is the ideal solution for overdenture restorations.

- **Low Profile.** A low vertical height makes the Locator Overdenture Attachment an effective option for treatment of a wider range of patients.

- **Easy for Patients.** Self-locating attachment gives patients the ability to easily position and place their overdentures.

- **Predictable.** Dual retention and tremendous durability ensure long-lasting stability and performance.¹

- **Versatile.** A variety of options for retention and angulation correction let you tailor the case to fit the needs of the patient.

The Locator Overdenture Attachment’s unique combination of features offers outstanding advantages for you and your patients. The durable, low-profile design can be used in a wide range of overdenture cases and makes it easy for patients to seat their own denture correctly every time.

**Low Vertical Height:**

- Low-profile design provides a critical advantage in tight interocclusal spaces.

- Total abutment and attachment height is as low as 2.5 mm on a Tapered Screw-Vent® Implant.

- A variety of cuff heights allows you to accommodate varying tissue depth.

¹Data on file.
The right solution for you and your patients.

**Self-Aligning Design:**
- Self-locating design helps guide the attachment into place on the abutment.
- Patients can easily position and place their overdenture every time.
- Reduces wear on the nylon liners due to improper seating.
- Longer-lasting liners mean fewer recall visits for the patient.1

**Incredible Durability:**
- The Locator Overdenture Attachment retains on the inside and outside of the abutment for a stronger, longer-lasting fit.
- The unique dual retention design provides nearly twice the retentive surface area over internal retention attachments.
- The nylon male pivots inside the metal housing for a resilient connection.

**Versatility:**
- Flexibility in angulation and retention with a variety of nylon inserts.
- Three levels of retention are available for cases up to 10° off axis per abutment:
  1.5 pounds (blue), 3 pounds (pink) and 5 pounds (clear).
- Accommodates up to 40° of divergence for two implants (or 20° for one implant) with use of special nylon males with two levels of retention: 4 pounds (green) and 1.5 pounds (red).

Locator Overdenture Attachments are available for Tapered Screw-Vent, AdVent®, SwissPlus® and Spline® Implant Systems. For part numbers and pricing, please refer to the Zimmer Dental Price List for each product line.
