ZBI CLINICAL
Guided Implant Therapy for Immediate Implant Placement

ON-DEMAND CE VIRTUAL WEBCAST

PROGRAM DESCRIPTION:
This presentation will outline the clinical steps required for successful planning and execution by the implant team and discussing full-arch implant rehabilitation. CT technology and current computer software applications greatly enhance the ability of the implant team to diagnose, treatment plan, and perform implant-supported therapy in a more sophisticated and profound way with greater accuracy, lower morbidity, and in shorter timeframes to meet patients’ demands. In this program, a CT guided implant treatment protocol will be discussed for fabrication of a laboratory processed full arch restoration.

PROGRAM OBJECTIVES:
At the completion of the program, participants should be able to:
• Learn the nuances of top-down treatment planning to successfully plan for implant-supported therapy for the full arch.
• Understand the preoperative steps necessary to plan for ideal implant placement.
• Communicate the treatment plan with surgical, restorative and laboratory professionals to create an effective team approach and optimal patient outcomes.
• Plan and execute the surgery and restoration.
• Understand these cases from the patient perspective.
• Identify the appropriate restorative components needed for full-arch provisional restorations.

RICK A. KAPITAN, DDS MS, FACS
Dr. Kapitan is a Board Certified Oral & Maxillofacial Surgeon. He has both a Doctorate in Surgery and Masters of Science degree, as well as advanced training as a specialist in surgery and anesthesia (OMS) from The Ohio State University Medical Center. Dr. Kapitan is a Diplomate of the American Board of OMS and a Fellow of the American Association of OMS. He holds appointments as Adjunct Faculty in the Department of Oral & Maxillofacial Surgery at both Louisiana State University and the University of North Carolina, Chapel Hill. Dr. Kapitan is the Director of the Carolinas Center for Cleft Lip & Palate Surgery and of the Envision™ Implant Academy. He is a national lecturer and clinical course instructor in advanced dental implant surgery for Zimmer Biomet Institute. Internationally, Dr. Kapitan is a volunteer cleft surgeon, surgical team leader, and sits on the Board of Directors of the Free To Smile Foundation; a not-for-profit medical mission group that provides free cleft lip and palate surgeries to children in need around the globe.
