Puros® Pericardium

The Natural Choice For Guided Tissue And Bone Regeneration

Conformability

- Outstanding choice in cases using Puros Block Allograft coverage and large ridge augmentation procedures, where adaptability to surface contours is essential\(^1\)
- Easily assimilated into the body’s normal healing process\(^2\)
- Exhibits multidirectional strength and helps stabilize and maintain bone growth material in the defect space\(^1,2\)

Long-Lasting Durability

- Clinically demonstrated success in guided bone regeneration procedures\(^3,4\)
- Provides an excellent healing environment\(^1,5\)
- Functions as a barrier during the critical period of wound healing\(^2,4,6\)
- Long history of effective clinical results in general surgery applications\(^7\)

Absorbable And Easy-To-Use

- Eliminates second-stage surgery for membrane removal,\(^4\) reducing wound trauma and surgical chair time
- Rehydrates quickly
- Three convenient sizes can be cut to shape for specific procedures
The Unique Tutoplast Process

The Tutoplast Process is a validated chemical sterilization process that assures the highest standard of tissue safety; validated to achieve terminal sterility of SAL 10-6.²

The process preserves the valuable collagen matrix and tissue integrity while inactivating pathogens and gently removing unwanted materials, such as cells, antigens and viruses.²
