

Incorporating Nano Science and Digital Technologies to Impact Peri-implantitis Prevention

ON-DEMAND WEBCAST

PROGRAM DESCRIPTION:

Peri-implantitis is an emerging problem that affects between 11% and 47% of implant patients. It is generally accepted that peri-implant mucositis is a precursor to peri-implantitis. The anatomy of the peri-implant tissues largely depends on the position of the implant, the implant system used, and the clinical/prosthetic protocol followed. The design of the definitive implant abutment can be digitally enhanced to respect the biological space and prevent peri-implant breakdown. This program will review current knowledge about the causes of peri-implant disease, prevention strategies to prevent problems before they develop, including the selection of an implant system to help mitigate the risk of peri-implant disease.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Describe peri-implant mucositis, its causes, and treatment modalities.
- Describe peri-implantitis, risk factors involved, and potential treatment modalities.
- Understand the management protocol for treating early, moderate, and advanced peri-implantitis cases.
- Understand the term “explantation” and under what circumstances this treatment protocol is used.
- Understand and be able to implement a digital workflow utilizing the BellaTek® Encode® Impression System.

Munib Derhalli, DMD, MS, MBA

Dr. Derhalli graduated from Oregon State University and received his doctorate from Oregon Health Sciences University, School of Dentistry. While serving in the military, he completed a Masters in Business Administration and then a three-year Masters of Science residency in Periodontology at the University of Oklahoma Health Sciences Center. Dr. Derhalli has held teaching appointments at the University of Oklahoma Graduate Periodontics Department and at Oregon Health Sciences University Graduate Periodontics Department in the post-doctorate program. Dr. Derhalli is a Diplomate of the American Board of Periodontology and is a member of various dental societies. He maintains a private practice with a focus on periodontal plastic surgery and implant reconstruction in Vancouver, Washington.

ADA CERP®

Continuing Education Recognition Program

Zimmer Biomet Dental is an ADA CERP recognized provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to the Commission for Continuing Education Provider Recognition at ADA.org/CERP.

Zimmer Dental Inc.
Nationally Approved PACE Program Provider
for FAGDMASD credits.
Approval does not imply acceptance by
any regulatory authority or AGD endorsement.
01/01/2019 to 12/31/2020
Provider ID# 208673

REGISTRATION AND CANCELLATION POLICY: Registration is limited to practicing clinicians. Zimmer Biomet Dental reserves the right to cancel or substitute this program.

TRANSPARENCY REPORTING: All payments and “transfer of value” items provided to health care providers will be reported as required by federal and state laws and regulations. “Transfer of value” items include meals and continuing dental education credits. *The fair market value of this complimentary program will be reported as required under any transparency laws applicable in your region. In the USA, the reportable value per credit hour is USD \$50.

DISCLAIMER: Participants must always be aware of the hazards of using limited knowledge in integrating new techniques or procedures into their practice. Only sound evidence-based dentistry should be used in patient therapy. The information in this course is of a general nature and does not represent or constitute medical advice or recommendations and is for dental education purposes only. Zimmer Biomet Dental does not practice medicine or dentistry. Each clinician should exercise his or her own independent judgment in the diagnosis and treatment of an individual patient, and this course and information does not purport to replace the comprehensive training clinicians have received.
