

## Zimmer Biomet Restorative Reimbursement Application

### Laboratory Disclosure

**Zimmer Biomet provides a monetary benefit up to \$500 per free standing implant for the actual lab fees incurred.** To receive this benefit, the surgeon must have submitted the failed implant along with a warranty claim form. Once the restorative dentist has provided a completed lab reimbursement application and lab bill he can expect a check for the lab fees (up to \$500 per free standing implant) and replacement components within 45 days of receipt.

**Please attach a copy of the lab bill used in the fabrication of the failed crown(s). Zimmer Biomet will not issue any reimbursement without the lab bill.** Remember that Zimmer Biomet covers those costs associated with the original fabrication only, not refabrications.

### II. Zimmer Biomet Restorative Account Information
