Aesthetic with Anterior Implants and Guided Bone Regeneration

1st December 2019 (Sunday)

PROGRAM DESCRIPTION:
Success in Dental Implantology today is no longer benchmarked by good osseointegration but also includes bone and soft tissue stability which produces long term aesthetic results. Achieving optimal aesthetic result can be challenging and tedious. In most of the clinical scenarios, bone and/or soft tissue is missing post-extraction and augmentation procedures are necessary particularly in the aesthetic zone. Aesthetic implant failures can be multifactorial and can relate to patient management issues. Therefore, clinicians must understand and be made aware of circumstances that can predispose to such failure.

This presentation will begin with clear diagnostic criteria for tooth extraction followed by a comprehensive description of different protocols- immediate, early placement and delayed placement, to achieve the best and most predictable results. For cases involving edentulous ridges with severe atrophy, guidelines will be discussed to formulate a diagnostic evaluation of the type of bone and soft tissue deficiency present which then can be used to identify the best technique of bone regeneration and soft tissue enhancement needed. The aim is to provide some practical insights in choosing the best procedure and most suitable materials for different clinical conditions while not neglecting basic anatomy and physiology.

Lastly, Dr Cheirico will discuss on compromised aesthetic cases and clinical solutions provided. This will provide the clinicians with a therapeutic guide on how to solve aesthetic issues with an evidenced based clinical approach.

Dr. Andrea Chierico

Dr. Andrea Chierico achieved his DDS from Padova University (Italy) in 1987. In June of 1992 he attended Boston University School of Dental Medicine in Boston (MA), where he received his Certificate in Advanced Education in Periodontology in 1995. In 1994 he conducted experimental studies at University of Padova and Brown University (USA) on the topic of osseous regeneration. The outcome of the research was later published in 1999. From 1995 till 2001 he was a Clinical Faculty in the postgraduate Periodontology program of the University of Padova and along the years had worked with various universities to formulate their post graduate courses in Oral Surgery and Implantology in Italy and Spain. From 2011 to present, he is a visiting professor at the University of Torino, Dept. of Periodontology. He also founded and became the president of ABCDental, a Continuing Education Center for surgical and prosthetic implant restorations in 2011. He is currently a member of the American Academy of Periodontology (AAP), Italian Association of Dentists (ANDI), the Italian Society of Periodontology (SIdP) and SIO (Italian Society of Osseointegration ) where he a member of its scientific committee. He is a renown speaker and has spoken at various conferences worldwide focusing on topics in Periodontology and Implantology. Dr.Chierico owns a multi-specialist practice in Verona and limits his own practice to only Periodontology and Implantology. He is also an author of different scientific publications.
Aesthetic with Anterior Implants and Guided Bone Regeneration

1st December 2019 (Sunday)

DATE/TIME:
Sunday, 1st December, 2019
Registration: 08:45 a.m.
Seminar: 9:00 a.m. – 4 p.m.

Country:
Singapore

REGISTER:
Registrations are available on a first-come, first-served basis as seating is limited.
