

ZBI LIVE CASE PRESENTATIONS

Overdenture Therapy

COMPLIMENTARY LIVE CE VIRTUAL PROGRAM

PROGRAM DESCRIPTION:

Despite large advances in oral health, there are millions of people affected by edentulism. As a result, there is a large demand for full-arch rehabilitation. In this program a clinical case demonstrating treatment in an edentulous patient with overdenture therapy, will be presented. The procedures will be presented and explained, using clinical records, radiographs, models, and photographs. The criteria for selection of materials and technologies, and alternatives, will be discussed as there are relevant to the case. At the completion of the case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment might be performed differently.

PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify the clinical benefits of implant treatments for the edentulous mandible.
- Select an appropriate implant treatment using patient-specific, restorative, biologic, and biomechanical criteria.
- Understand the clinical steps involved in restoring a two-implant retained overdenture.
- Understand troubleshooting techniques for two-implant retained overdentures.

Amy Ridall, DDS, MS, PhD

Dr. Ridall received a dental degree from the State University of New York at Buffalo School of Dentistry. Following graduation, she earned a Master of Science in Oral Biology from SUNY Buffalo. She received her PhD in Biomedical Sciences from the UT Houston Health Science Center Graduate School of Biomedical Sciences and Certificate in Prosthodontics from the Dental Branch. In addition to private practice, she is a part-time Clinical Assistant Professor in the Department of Restorative Dentistry and Prosthodontics at the University of Texas Houston Health Science Center, School of Dentistry where she serves as the Coordinator of Implant Programs for undergraduate and graduate programs. Dr. Ridall is on

the faculty for the Zimmer Biomet Institute in Carlsbad, CA
