

Surgical and Restorative Considerations for Immediate and Delayed Loading

20th - 21st October 2018 (Saturday and Sunday)

PROGRAM DESCRIPTION:

Today, dental implants come in various shapes and sizes as well as surface treatment. Is the size and height of implants used based solely on area that is available? Does big really mean better? Does the type of surface treatment impact the osseointegration of immediate loading cases?

In this lecture and hands on program, **Dr Matthias Stamm** will focus on the indications, patient selection and criteria for the implant of choice with the emphasis on prosthetic driven backward planning. He will also discuss on bone maintenance and growth of bone including socket preservation. Soft tissue management will also be discussed both for anterior and posterior implants focusing on aesthetic matters such as growth of papilla. There will be an in depth look into how to avoid complications and management of complications which includes bone resorption, implant placement issues and occlusion.

Program Fee
Complimentary*

Program Level
Intermediate

HANDS ON INCLUDE:

DIAGNOSIS AND TREATMENT PLANNING

- Patient selection
- Implant selection
- Use of Caresteam Software

IMPLANT PLACEMENTS AND RESTORATIVE STEPS

- Placing of implants
- Temporization
- Impression taking

IMMEDIATE IMPLANTS

- Placing implants with hard tissue and soft tissue management
- Guided bone regeneration

Surgical and Restorative Considerations for Immediate and Delayed Loading

20th - 21st October 2018 (Saturday and Sunday)

Matthias Stamm, DMD, PhD

Dr Matthias Stamm graduated from the University of Freiburg (Germany) in 1995 with his Doctorate degree in Dental Surgery. He continued his studies to include Implantology and Periodontology. Matthias went on to become an Associate Professor of Oral Surgery and Implantology at the University of Dusseldorf, followed by ownership of a private clinic in Overath, Germany.

He moved to Whangarei in 2016 and joined the team at Kowhai Dental in May, 2017. He continues to be a world-renown speaker on Implantology and Restorative Dentistry.
