

# ZBI LIVE CASE PRESENTATIONS

## Full-Arch Rehabilitation

### COMPLIMENTARY LIVE CE VIRTUAL PROGRAM

#### PROGRAM DESCRIPTION:

This program will demonstrate a step-by-step, practical approach to delivering provisional full-arch prostheses on the day of implant placement. The design and fabrication of the definitive prosthesis will also be discussed, as well as the appropriate timeframe for delivery. Multiple clinical case examples will be presented demonstrating optimal treatment for patients presenting with various, challenging clinical situations. The procedures will be presented and explained, using clinical records, radiographs, models, and photographs. The criteria for the selection of materials and technologies, and alternatives, will be discussed as they are relevant to each case. At the completion of each case presentation, the clinical perspective of the treating clinician will be summarized to include: key takeaways from the treatment; a discussion of the most successful aspect of the treatment; and how the same treatment type might be performed differently.

#### PROGRAM OBJECTIVES:

At the completion of the program, participants should be able to:

- Identify potential candidates for immediate full-arch restorations.
- Diagnose and develop a treatment plan for these procedures.
- Communicate the benefits of this treatment to gain patient acceptance.
- Fabricate an immediate full-arch provisional restoration following the RevitaliZe® Guidelines.
- Understand the design and fabrication principles for the definitive prosthesis.

#### Matthew Young, DDS

Dr. Young earned a dental degree at the University of Buffalo, graduating with honors. He completed the General Practice Residency Program at the Albert Einstein Medical Center in Philadelphia, PA, where he also served as an attending clinician. Dr. Young has more than fifteen years experiencing placing and restoring implants in private practice. He is a Diplomate of the American Board of Oral Implantology, an Honored Fellow of the American Academy of Implant Dentistry, and also served as its Western District President, Board of Trustees, Admissions and Credentials Board, Education Committee Board, and Annual Meeting Program Chair. Dr. Young is the founder of the Bay Area Implant Synergy Study Group. He lectures nationally and internationally on implant dentistry and cosmetics, while maintaining a private practice in Downtown San Francisco.
